

WBCIR:20410

Speeds remained relatively consistent at the beginning of the week, with Monday and Tuesday showing averages of 19.7 mph and 19.2 mph respectively. A gradual decline was observed midweek, with speeds dropping to 18.1 mph on Wednesday and reaching a low of 14.2 mph on Thursday. Friday saw a slight improvement to 15 mph. Over the weekend, traffic conditions appeared to ease, with speeds increasing to 20.6 mph on Saturday and 20.3 mph on Sunday. Notably, eastbound and westbound speeds were identical each day, indicating balanced traffic flow and shared influencing factors. The midweek reduction in speed may suggest increased congestion or temporary disruption during that period.

Date (2025)	Average Speed (Eastbound)	Average Speed (Westbound)
Mon 9 th June	19.7	19.7
Tue 10 th June	19.2	19.2
Wed 11 th June	18.1	18.1
Thu 12 th June	14.2	14.2
Fri 13 th June	15	15
Sat 14 th June	20.6	20.6
Sun 15 th June	20.3	20.3
